

Bring The Works to your school!

Family Engineering Night

Make and Take Activities

Science
Technology
Engineering
Math

We bring
experts and
all the
supplies...

You bring
volunteers
and 75-500 kids

the
Works

www.theworks.org
952-888-4262

Small

- 2 hour event plus ½ hour of training volunteers right before event
- 3 hands-on activities total in one room
- Each visitor spends *30-40 minutes* to do all the activities.
- Capacity at one time is 30 people, total capacity is 100 people
- 1 expert from The Works plus 6 volunteers from your organization

Cost: \$225 for up to **75** people
\$300 for up to **125** people

Sample activities for small event:

Circuit play (electrical)
Magnets (physical science)
Liquid layers *or* fizz rockets (chemistry)
Silly Putty (chemistry) *or* kaleidoscopes *or* rainbow glasses (physical science)

Medium

- 2 hour event plus 1 hour training volunteers prior to the event
- 5 hands-on activities total, uses 5 classroom sized rooms
- Each visitor spends approximately *one hour* to do all the activities.
- Capacity at one time is 150 people, event capacity is 300 people
- 1 expert from The Works plus 10 volunteers from your organization

Cost: \$450 for up to **150** people
\$525 for up to **200** people
\$600 for up to **250** people
\$675 for up to **300** people

Sample activities for medium event:

Circuit play (electrical)
Liquid layers *or* fizz rockets *or* dry ice (chemical)
Crazy Racers *or* catapults *or* pasta towers (mechanical or civil)
Magnets *or* shapes and structures (physical science or math/architecture)
Estimation (math)

Large

- 2 hour event plus 1 hour training volunteers prior to the event
- 9-10 hands-on activities total, uses 10 + classrooms
- Each visitor spends up to *2 hours* to do all the activities.
- Capacity at one time is the same as event capacity.
- 2 experts from The Works plus 20 volunteers from your organization

Cost: \$950 for up to **300** people
\$1200 for up to **400** people
\$1450 for up to **500** people
\$1700 for up to **600** people

Sample activities for large event:

Circuit play (electrical)
Liquid layers *or* fizz rockets *or* dry ice (chemical)
Crazy racers (mechanical engineering)
Catapults or bridges (mechanical)
Rainbow glasses *or* kaleidoscopes (physical science)
Paper airplanes or straw rockets (aeronautics)
Robots (technology, programming)
Magnets (physical science)
Polymer putty (chemical)
